Tizen SDK and Web App Development

Cheng Luo

LinuxCon Europe 2012

Agenda

- Tizen 2.0 alpha SDK
- Web app development

Tizen 2.0 alpha SDK

- IDE - Eclipse based
- Emulator - qemu based
- Web based (Chrome) simulator
- UI Builder
- Event Injector
- Remote inspector /Firebug
- Documentation & Sample code

Installing SDK

- The SDK supports Windows and Ubuntu
- The SDK Mac version is coming soon
- Installation Manager supports the snapshot-based or SDK image-based installation
- Pay attention to prerequisites, specially on Ubuntu (JDK, JRE, qemu, VTx support etc.)

Install JDK on Ubuntu

- Tizen IDE is based on Oracle Java v7, **not** OpenJDK
- Oracle doesn't allow re-distribution of Java packages, so...

- oab-java6 a good script for installing oracle-jdk, oracle-jre on Ubuntu
- still need some tweaks to install the latest JDK-7u9 with oab-java6☞

☞: https://github.com/flexiondotorg/oab-java6

Running IDE on Ubuntu

- Install *libwebkitgtk-1.0-0*, if you get error such as☞:

```
Exception in thread "main" org.eclipse.swt.SWTError: No more
handles [Unknown Mozilla path (MOZILLA_FIVE_HOME not set)]
```

- Install *Ajax Tool Framework (ATF)* if Event Injector is not shown☞

:first-child 111 points	static				static	yes		yes				yes				yes		yes			

Static
The browser doesn't correctly update the styles of the original element when another element is placed before it.

rows[] 110 points	incorrect				yes			yes				yes				yes		yes			

```
x.rows
```

A nodeList with all rows of table `x`.

Incorrect
The browser keeps to the source code order, where the `<tfoot>` is the second row.

+ selector 108 points	static				static	yes		static	yes			yes				yes		yes			

Static
The browser doesn't correctly update the styles of the original element when another element is placed before it.

getElementsByClassName() 102 points	no				yes			yes				yes				yes		yes			

```
document.getElementsByClassName('test')
document.getElementsByClassName('test test2')
```

The first expression returns a nodeList with all elements that have a `class` value that contains "test". The second one returns a nodeList will all elements that have a `class` value that contains both "test" and "test2" (in any order).

Test	Symb 1	Symb 2	Symb 3	S40	iOS 2.2	iOS 3.1	iOS 4.2	And 1.0	And 1.6	And 2	And 3	Dolfin	BB 6	BB PB	Phantom	Palm 2.0	Palm 2.1	Bolt 1.5	Ozone 0.9	Obigo 10	WeTab
querySelectorAll() 102 points **weight 2**	no				yes			yes				yes				yes		yes			

```
document.querySelectorAll('.testClass')
document.querySelectorAll('.testClass + p')
```

Returns a nodeList with all elements that have a `class` value that contains "testClass"; or a nodeList with all paragraphs directly following such an element.

Essentially, this method allows you to use CSS syntax to retrieve elements.

:nth-of-type()	no				yes			yes				yes				yes		yes
